

ALCHEMIZE RESOURCE LIBRARY · BUSINESS TAX

Business Tax Preparation Organizer

A tax-season preparation system -- what changed, what you have, what's missing, and what to ask your preparer.

USE THIS WORKBOOK TO

- ◆ Capture every business change that could affect this year's return
- ◆ Reconcile income before your preparer has to ask why it does not match
- ◆ Turn missing documents into a tracked, followed-up list
- ◆ Walk into tax season with your questions already written down

ESTIMATED TIME

30-40 minutes, plus time to gather documents

HAVE NEARBY

Prior-year return, bookkeeping access, payment-processor summaries

A strong tax organizer does not start with forms. It starts with facts: what changed, what records exist, what is still missing, and what can be explained clearly to a preparer.

Questions to ask

01 BUSINESS SNAPSHOT

START HERE

Fill in what you know today. A blank field tells your preparer exactly what still needs confirming -- that is useful, not a failure.

Field	Current information
Tax year / legal business name	
DBA / EIN	
Entity type / state(s) of operation	
Accounting method, if known	
Bookkeeping platform	

02 BUSINESS CHANGE TIMELINE

- ☐ Ownership, entity structure, location, or states of operation
- ☐ Employees, contractors, or new revenue streams
- ☐ Equipment, assets, loans, vehicles, or major purchases
- ☐ Closure, sale, or discontinuation of activity

Change details and dates

Income reconciliation

The most valuable organizer does not just collect totals. It checks whether they agree with each other, and flags what needs a closer look before the return is prepared.

01 BOOKKEEPING READINESS

- ☐ Bookkeeping is current through year-end
- ☐ Revenue and bank deposits have been reviewed
- ☐ Payment-processor totals and information returns have been compared
- ☐ Outstanding receivables, refunds, and chargebacks are identified
- ☐ Cash income is recorded where applicable

02 INCOME RECONCILIATION

Income source	Books total	Processor / 1099 total	Difference	Resolved?

03 COMMON REASONS TOTALS DIFFER

TIMING	PROCESSOR FEES	REFUNDS	CHARGEBACKS	GROSS VS. NET	TRANSFERS
--------	----------------	---------	-------------	---------------	-----------

Identify, do not force

A difference is a question to investigate. Do not change records merely to match another statement without understanding timing, fees, refunds, duplicates, or other causes.

Reconciliation questions for your preparer

Expense and owner activity

This is a record-organization exercise, not a classification exercise. The goal is to identify where support exists, what questions remain, and what to raise with your preparer -- not to decide how anything is treated.

01 EXPENSE CATEGORIES

Category	Bookkeeping complete?	Supporting records?	Question
Advertising / software			
Office / supplies			
Professional services / insurance			
Rent / utilities			
Travel / meals / vehicle			
Contractors / payroll			

02 OWNER ACTIVITY

Activity	Records complete?	Amount reviewed?	Question
Owner-paid expenses / reimbursements			
Owner contributions			
Owner distributions / draws			

No tax determination here

Record the facts and locate support. Classification, deductibility, depreciation, and reporting are determined separately, with your preparer.

03 QUESTIONS TO FLAG

- ☐ Personal and business activity mixed together
- ☐ Large unusual purchase or expense
- ☐ Missing receipt or source support
- ☐ Owner activity not recorded separately

People, assets, and other records

A business tax organizer becomes more useful when it captures the people and assets driving activity -- not just the accounts.

01 CONTRACTORS AND PAYROLL

Item	Complete?	Source available?	Notes
Contractor payments (W-9 on file)			
Payroll summaries and filings			
Year-end payroll reports			
Employee benefits or compensation			

02 ASSETS AND EQUIPMENT

Asset	Date acquired	Cost	Business use

03 OTHER RECORD AREAS

☐	Vehicles or mileage records
☐	Inventory records
☐	Loans and financing statements
☐	Insurance records and estimated tax payments
☐	Depreciation or basis information

Tax records and correspondence

Before filing, confirm you have the full set of documents that explain the year: prior filings, notices, and the actions already taken in response to each one.

- ☐
- Prior-year return and supporting schedules
-
- ☐
- Depreciation schedules, if applicable
-
- ☐
- Estimated-tax and extension payments
-
- ☐
- State, local, and payroll filings
-
- ☐
- Sales-tax filings, where applicable

01

NOTICE TRACKER

WHY THIS MATTERS

Keep the notice, the response, payment confirmation, and related correspondence together. A partial paper trail is a common source of preparer delays.

Agency	Notice date	Deadline	Issue	Status

Final filing readiness

A finished organizer is not a filing list. It is a readiness check for both the preparer and the owner.

01 READINESS DASHBOARD

Category	Not started	In progress	Ready	Professional review
Bookkeeping and reconciliation				
Expense support and owner activity				
Payroll, assets, and contractors				
Prior filings and notices				

02 MISSING-ITEMS TRACKER

Missing item	Owner / issuer	Requested	Status

03 QUESTIONS FOR YOUR PREPARER

Questions and facts to review together

04 AFTER FILING

- ☐ Retain the return and supporting schedules
- ☐ Note carryforward and recurring items
- ☐ Improve next-year bookkeeping and calendar the next deadlines

Security reminder

Do not send EIN records, banking information, returns, identity documents, or payroll records through an unsecured contact form or ordinary email. Use only an approved secure method when instructed.

Before you send this to your preparer

You now have a change timeline, reconciled income, organized expense support, and a tracked list of what is still missing. That is the difference between a preparer who has to chase down answers and one who can start working immediately.

What still feels uncertain about this year's numbers?

NEXT STEP

THE RECORDS ARE ORGANIZED. LET'S GET THE TREATMENT RIGHT.
